Abstract of CN 1245537 (A)

The hypersomotic pesticide and chemical product prepared by using nitrogen-ketone liquid mixture or powder relates to the field of pesticide preparation processing and chemical product additive technology. Said invention provides the new product form of nitrogen-ketone compound so as to solve the problems of some pesticides which are not obvious in raising pesticide effect, high in cost and can not directly mix with powder pesticide preparation, etc.. Said invented product can be used for improving and raising the performances of lubricating agent, binding agent, printing ink and ink, printing dye, industrial cleaning agent, water treatment agent and leather chemicals.
